Bjørn Andreas Andersen

Born April 23, 1996 in Bergen, raised on Karmøy
Address: Urdavegen 23, 5549 Røvær

Maker and problem-solver with hands-on experience across 3D printing, product design and technical documentation. Built and managed innovation workshops, worked with over 50 clients on design and production, and authored technical manuals across 7 languages. With training in network administration and self-taught web development — equally comfortable building furniture as building servers.

Education

2025 – 2026 **Noroff, Online study**
Technical drawing – Mechanical

2021 – 2022 **Noroff, Online study**
Network and System Administration

2018 – 2020 **Skap Kreativ Folkehøyskole**
Student and scholarship recipient

2017 – 2018 **Sonans, Bergen**
Upper secondary supplement

2012 – 2014 **Åkrehamn Videregående Skole**
Electrical studies

Skills

· 3D modelling, direct and parametric
· 3D scanning
· Mechanical / product design
· CO2 laser cutting / CNC machining / Vinyl cutting
· Design / operation of workshop and production equipment
· Image editing, vector and pixel based
· System administration
· Technical documentation
· Training / knowledge transfer / technical support

Experience

2020 – Present **Sole proprietor at Polybjorn Andersen**
Design and production services with a focus on 3D printing, spanning furniture, fittings, and custom commissions. Works directly with clients or collaborates with other makers.

2021 – 2026 **Additive manufacturing workshop manager at Lindesnesregionen Næringshage**
Helped establish and independently managed the Addidé innovation centre, offering courses in 3D design and printing, design services, and series production. Worked with over 50 clients across design development, modelling, and FDM and SLA printing.

2022 – 2024 **Technical writer at Nøsted &**
Modernised operator manuals for multiple Igland machine ranges across 7 languages in collaboration with engineers: new 3D models, renders, vector graphics and restructured text.

2022 – 2024 **Technician at Mandal Frivilligsentral**
Helped build and run Bua Makerspace, a Prusa 3D printer farm and internet café, open to the public. Technical support, courses and event responsibility.

2018 – 2023 **Various roles at Skap Kreativ Folkehøyskole**
Workshop operations and maintenance of 3D printers, CNC and laser equipment, day-to-day building operations, event and stand hosting, catering, student project support and teaching. Also produced furniture for students, staff, and the school, as well as gifts for guest speakers.

2014 – 2017 **Electrician apprentice at Apply TB**
Worked across residential service calls and large-scale construction projects, including fibre installation for Haugaland Kraft.

Certifications

· Driver's license class B
· Drone pilot certificate, EASA A1/A3
